CARYANAM_BIDDING APP – Vehicle Inspection & Dealer Bidding Platform

Project Overview

AutoBid Inspect is a smart vehicle inspection and dealer auction platform designed to simplify the process of vehicle evaluation, listing, and bidding.

In this system:

- Inspectors inspect and upload vehicle details.
- Dealers view verified vehicle reports.
- Dealers participate in live bidding and auctions.
- The highest bidder wins the vehicle.

The platform creates a transparent, fast, and secure ecosystem for vehicle auctions.

Need for the Project

Traditional vehicle auction systems are mostly manual and lack transparency. Dealers often do not receive complete inspection details before purchasing a vehicle.

Problems in Traditional Systems

- Manual paperwork
- Incomplete vehicle information
- Delayed communication
- Lack of transparency
- Difficult bid tracking
- High operational effort

Solution Provided

AutoBid Inspect digitizes the complete process by offering:

- Digital inspection reports
- Real-time dealer bidding
- Centralized vehicle management
- Instant notifications
- Secure and transparent auctions

How the Project Works

Step 1 – Vehicle Inspection

The inspector checks the vehicle condition including:

- Exterior
- Interior
- Engine
- Tires
- RC & document verification

Step 2 – Vehicle Upload

The inspector uploads:

- Vehicle details
- Images
- Inspection reports
- Pricing information

Step 3 – Auction Creation

Admin approves the vehicle and creates an auction with:

- Base price
- Auction timing
- Bid rules

Step 4 – Dealer Bidding

Dealers:

- View vehicle details
- Check inspection reports
- Place bids in real-time

Step 5 – Auction Completion

The highest bidder wins the auction and sales reports are generated.

Key Features

Feature	Description
Vehicle Inspection	Complete digital inspection process
Vehicle Images	Multiple vehicle image uploads
Live Auction	Real-time dealer bidding
Inspection Reports	Verified vehicle condition reports
Dealer Dashboard	Manage bids and auctions
Notifications	Instant bid and auction alerts
Secure Login	Role-based authentication
Reports & Analytics	Auction and sales insights

User Roles

Admin

- Approves vehicles
- Manages auctions
- Generates reports

Inspector

- Inspects vehicles
- Uploads reports and images
- Adds vehicle details

Dealer

- Views vehicles
- Participates in bidding
- Tracks auction history

Technology Stack

Frontend

- React.js / Angular
- HTML, CSS, JavaScript

Backend

- Java Spring Boot / Node.js
- Language :JAVA
- Real-time communication : Web-socket/Socket.IO

Database

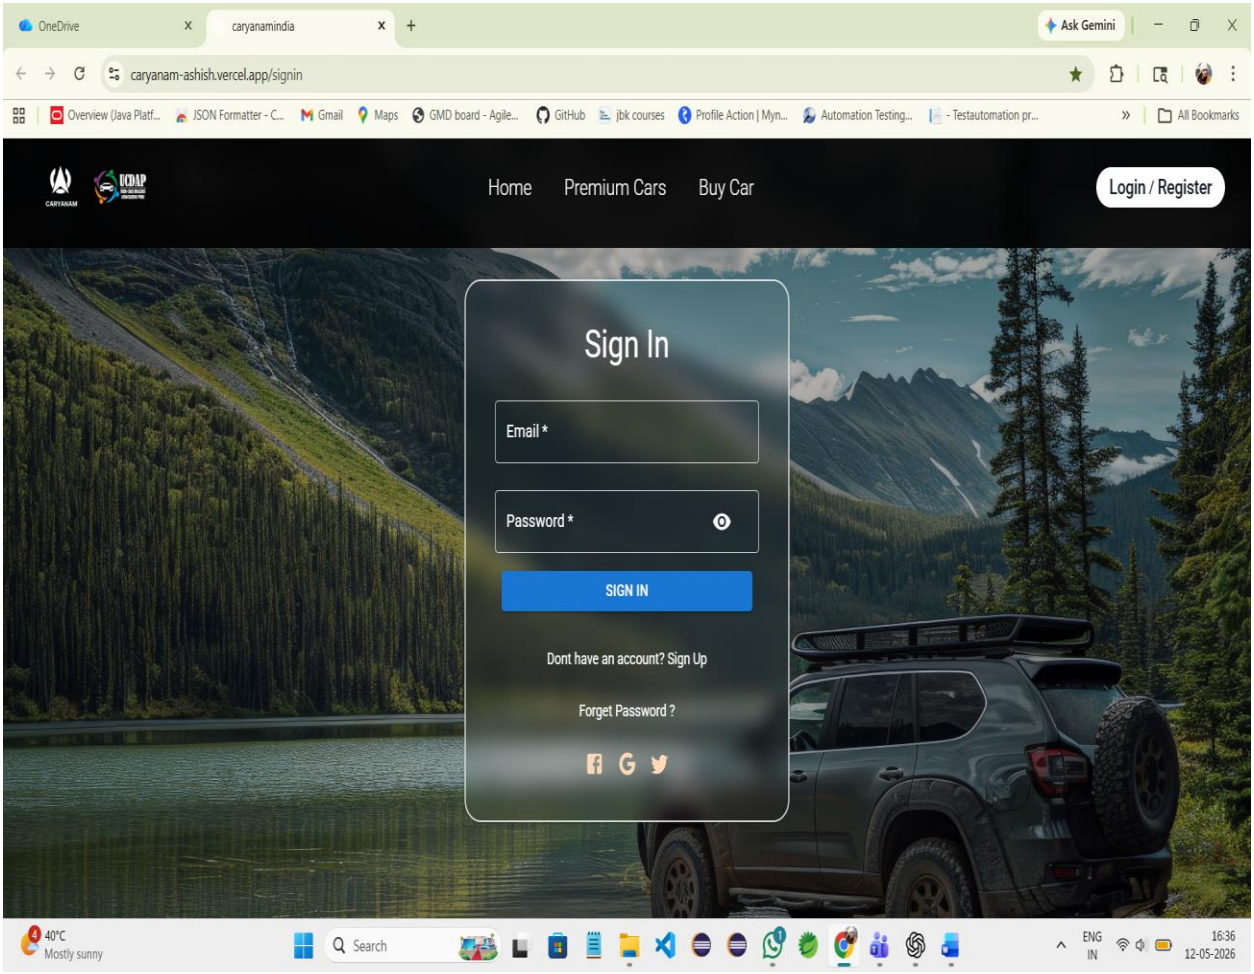

- MySQL / PostgreSQL
- Spring Data JPA/Hibernate

Tools

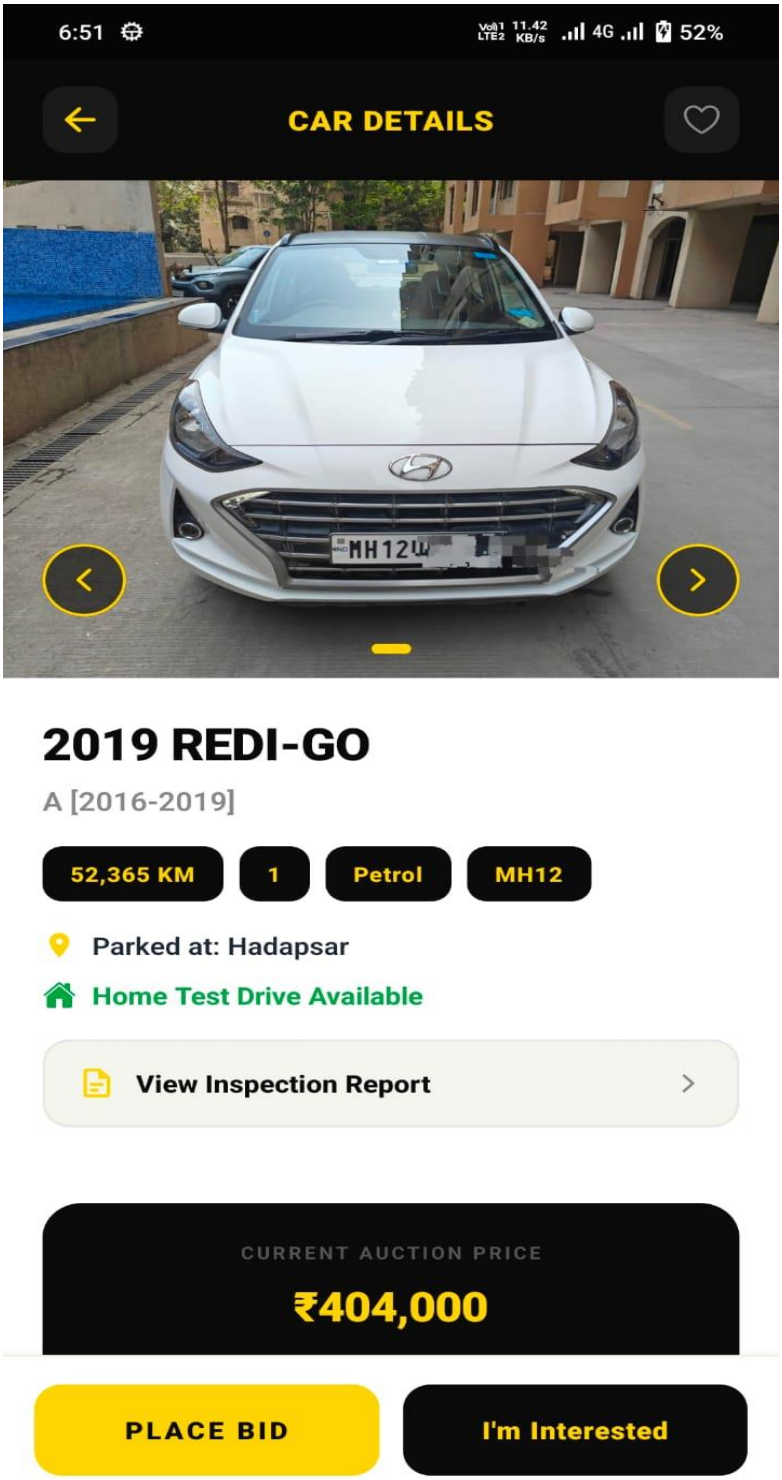

- GitHub
- Postman
- Maven

Advantages of the System

- Transparent bidding process
- Faster vehicle inspections
- Reduced paperwork
- Centralized vehicle records
- Real-time auction updates
- Improved dealer trust
- Better operational efficiency

Future Enhancements

- AI-based vehicle valuation
- Mobile application support
- Online payment integration
- Video-based inspections
- AI damage detection

Conclusion

AutoBid Inspect is a modern vehicle inspection and auction platform that helps inspectors and dealers manage vehicle bidding efficiently.

The system improves transparency, reduces manual work, and provides a smooth and secure auction experience for all users.

It is an ideal solution for used car marketplaces, automobile dealers, and vehicle auction companies.
